[°] Fund available for Wholesale Clients as defined in the Corporation Act of 2001

* For information about return calculations after fees please refer to Table 1.

** The monthly distribution return is calculated as the distribution amount declared for the month-end divided by the ex-distribution unit price at the start of the month. Bentham intends to achieve an average distribution rate of 3.75% - 4.25% for FY2018 with taxable income. If there is a shortfall of taxable income, the distribution could possibly include a capital return. The current distribution rate setting was based on the running yield of the Fund as at 30 June 2017 and assumes the Fund continues to achieve an equivalent yield for FY2018. Actual distributions, however, can differ from this setting because of future matters which are not known or able to be presently identified.

[^] Credit yield spread is yield to maturity above the duration adjusted risk free bond rate.

Past distributions are no indication of future distributions.

* Calculated as the cents per unit (CPU) distribution at month end divided by the ex-distribution unit price at the start of the month.

** Annual Distribution Return (Year-to-Date) is calculated as the Total Return (after fees) minus Growth Return. Total Returns (after fees) are calculated using pre-distribution month end withdrawal unit price and assumes all distributions are reinvested. Growth Returns equal the percentage change in the unit price.
