⁵ Volatility is Standard Deviation.

⁶ Sharpe Ratio is the excess return over the Bloomberg AusBond Bank Bill Index (before fees) divided by Standard Deviation.

⁸ Information Ratio is the Active Return (before fees) divided by the Tracking Error.

¹⁰ Target distribution rates for FY21 set at one month Australian Bank Bill Swap Rate (BBSW) plus a range of 4.25% to 4.75% of the monthly unit price. Bentham intends to achieve the distribution rate for FY2021 with taxable income. If there is a shortfall of taxable income, the distribution may possibly include a capital return.

The current distribution rate setting was based on the running yield of the Fund as at 30 June 2020 and assumes the Fund continues to achieve an equivalent yield for FY2021. Actual distributions, however, can differ from this setting because of future matters which are not known or able to be presently identified.
