### **Portfolio and Market Returns**

The Bentham Syndicated Loan Fund NZD had a total return (after fees) of -0.33% in the month of February, outperforming the benchmark (Credit Suisse Leveraged Loan Index hedged into NZD) by 0.10%. On a before fees basis the fund returned -0.22% for the month, outperforming the benchmark by 0.20%.

### **Fund Statistics**

Active return (after fees)2

At month end, the Fund had a yield to maturity of 6.91% and running yield of 5.08%, with the credit yield spread decreasing by 2 bps to 417 bps during the month. The Fund had an interest rate duration of 0.56 years and credit duration of 3.70 years.

### **Leveraged Loan Market**

The discount margin (3 year) for the Index increased by 18 bps during the month to 450 bps.

The top performing leveraged loan industries in February were Metals/Minerals, Energy and Gaming/Leisure with returns (sector performance in USD terms) of 0.29%, -0.12% and -0.13% respectively. The worst performing loan industries were Utility, Retail and Media/Telecommunications with returns of -1.28%, -0.76% and -0.72% respectively.

### **Portfolio Exposures**

The Fund's three largest industry exposures are 12.7% in Electronics, 12.5% in Healthcare, Education and Childcare and 8.8% in Diversified/Conglomerate Service. The Fund's top three company exposures are 1.3% in Polaris Newco, 1.0% in Finastra and 0.9% in Alliant. During the month, the Fund increased its exposure to Pmhc, CPM Acquisition and Austin; with decreased exposures to Cooper-Standard Automotive, United Natural Foods and Virtus Investment Partners.

| Portfolio Summary Statistics        |                |  |
|-------------------------------------|----------------|--|
| Yield to maturity                   | 6.91%          |  |
| Running yield                       | 5.08%          |  |
| Credit spread <sup>3</sup>          | +417bps        |  |
| Number of issuers                   | 406            |  |

| 5 Year Information Ratio <sup>8</sup> | 0.68 |  |

| <b>Fund Distributions</b>                     |                    |
|---|--------------------|
| Distribution frequency                        | Monthly            |
| Monthly distribution <sup>9</sup>             | 0.37% (Feb 2022)   |
| Target distribution rate (FY22) <sup>10</sup> | 1m NZ BKBM + 3.25% |

<sup>&</sup>lt;sup>1</sup> Total Return (after fees) is calculated using pre-distribution month end withdrawal unit prices, and assumes all income is reinvested in additional units. Total Return equals Growth return (after fees) plus Distribution return (after fees).

<sup>&</sup>lt;sup>2</sup> Active Return of the Fund is the difference between the Total Return and the return of the Benchmark. Gross Returns (before fees) are calculated by adding back the fees and expenses deducted. Please refer to the PDS for more information on fees and expenses.

<sup>&</sup>lt;sup>3</sup> Spread over the swap rate.

<sup>&</sup>lt;sup>4</sup>The average credit quality is calculated using a duration adjusted Moody's Weighted Average Rating Factor (WARF) for both the S&P and Moody's security credit ratings within a portfolio.

<sup>&</sup>lt;sup>5</sup> Volatility is Standard Deviation.

<sup>&</sup>lt;sup>6</sup> Sharpe Ratio is the excess return over the Bloomberg NZBond Bank Bill Index (before fees) divided by Standard Deviation.

<sup>&</sup>lt;sup>7</sup> Tracking Error is the Standard Deviation of the Active Return (before fees).

<sup>&</sup>lt;sup>8</sup> Information Ratio is the Active Return (before fees) divided by the Tracking Error.

<sup>&</sup>lt;sup>9</sup> Calculated as the cents per unit (CPU) distribution at the month end divided by the ex-distribution unit price at the start of the month.

<sup>&</sup>lt;sup>10</sup> Target distribution rates for FY21 set at one month New Zealand Bank Bill Swap Rate (BKBM) plus a range of 4.25% to 4.75% of the monthly unit price. Bentham intends to achieve the distribution rate for FY2021 with taxable income. If there is a shortfall of taxable income, the distribution may possibly include a capital return.

The current distribution rate setting was based on the running yield of the Fund as at 30 June 2020 and assumes the Fund continues to achieve an equivalent yield for FY2021. Actual distributions, however, can differ from this setting because of future matters which are not known or able to be presently identified.

#### Past distributions are no indication of future distributions.

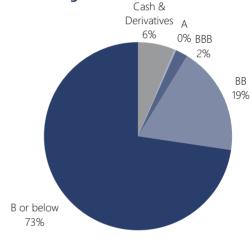

- <sup>1</sup> Calculated as the cents per unit (CPU) distribution at month end divided by the ex-distribution unit price at the start of the month.
- <sup>2</sup> Annual distribution return (Year-to-Date) is calculated as the Total Return (after fees) minus Growth Return. Total Return (after fees) is calculated using pre-distribution month end withdrawal unit price, and assumes distributions are reinvested. Growth Return equals the percentage change in unit price.
