Portfolio and Market Returns

Investment markets were mixed in January as hopes of near-term rate cuts subsided. Developed market equities were higher while Global government bonds saw a partial reversal of the gains experienced in late 2023. Both IG credit and High Yield bond markets were weaker, while Syndicated Loans registered solid gains on a wave of refinancing as well as their floating rate characteristics.

The top contributors to performance included Capital Securities, Global Syndicated Loans and Collateralised Loan Obligations (CLO); whilst the bottom performing contributors included Bond, Global High Yield and Global Hybrids.

¹⁰ Bentham intends to achieve the distribution rate for FY2024 with taxable income. If there is a shortfall of taxable income, the distribution may possibly include a capital return.

The current distribution rate setting was based on the running yield of the Fund as at 30 June 2023 and assumes the Fund continues to achieve an equivalent yield for FY2024.

Actual distributions, however, can differ from this setting because of future matters which are not known or able to be presently identified.
