¹ Total Return (after fees) is calculated using pre-distribution month end withdrawal unit prices, and assumes all income is reinvested in additional units. Total Return equals Growth return (after fees) plus Distribution return (after fees).

² Active Return of the Fund is the difference between the Total Return and the return of the Benchmark. Gross Returns (before fees) are calculated by adding back the fees and expenses deducted. Please refer to the PDS for more information on fees and expenses.

Portfolio Returns

The Bentham Global Income Fund had a total return (after fees) of -0.24% in the month of December, underperforming the benchmark (50% Bloomberg AusBond Bank Bill Index, 50% Bloomberg AusBond Composite Index) by 0.08%. On a before fees basis the fund returned -0.18% for the month, underperforming the benchmark by 0.02%.

Market Update

Markets were mixed in December, with Australian equities outperforming global counterparts while domestic bonds lagged. The S&P/ASX 200 rallied on the strength of the resources and banking sectors, but unhedged global equity returns were eroded by a surging Australian Dollar.

In fixed income, global markets generally sold off. Yields rose across the US, Eurozone, and Japan, where the Bank of Japan raised its policy rate to 0.75%, a 30-year high. Conversely, UK Gilts rallied following better than expected inflation data. The Australian market was a notable laggard, with domestic rates climbing 22bps as the RBA held the cash rate at 3.60% while maintaining a hawkish stance. Citing persistent inflation and a tight labour market, the RBA prompted markets to price in two potential rate hikes for 2026.

Credit markets performed well over December as spreads tightened across the board. In the US, investment-grade corporates narrowed by 3bps, high-yield by 12bps, and leveraged loans by 11bps. Capital Securities (Tier 1 and Tier 2) also outperformed.

The Bentham multi sector Funds were lower for the Month but posted modest gains for the year. The multi-sector portfolio remains defensively positioned into 2026.

Fund Distributions

Distribution frequency	Monthly
Monthly distribution ⁹	0.34%
Target distribution rate (FY26) ¹⁰	4.00%

³ Spread over the swap rate.

⁴ The investment grade exposure is calculated using a duration adjusted Moody's Weighted Average Rating Factor (WARF) for both the S&P and Moody's security credit ratings within a portfolio.

⁵ Volatility is Standard Deviation.

⁶ Sharpe Ratio is the excess return over the Bloomberg AusBond Bank Bill Index (before fees) divided by Standard Deviation.

⁷ Tracking Error is the Standard Deviation of the Active Return (before fees).

⁸ Information Ratio is the Active Return (before fees) divided by the Tracking Error.

⁹ Calculated as the cents per unit (CPU) distribution at the month end divided by the ex-distribution unit price at the start of the month.

¹⁰ Bentham intends to achieve the distribution rate for FY2026 with taxable income. If there is a shortfall of taxable income, the distribution may possibly include a capital return. The current distribution rate setting was based on the running yield of the Fund as at 30 June 2025 and assumes the Fund continues to achieve an equivalent yield for FY2026. Actual distributions, however, can differ from this setting because of future matters which are not known or able to be presently identified.

Past distributions are no indication of future distributions.

¹ Calculated as the cents per unit (CPU) distribution at month end divided by the ex-distribution unit price at the start of the month.

² Calendar financial year.

³ In Oct-24, monthly distribution payments moved from start to the middle of the month, with Nov-24 being the first mid-month distribution, Oct-24 distribution was omitted.

⁴ Annual distribution return (Year-to-Date) is calculated as the Total Return (after fees) minus Growth Return. Total Return (after fees) is calculated using pre-distribution month end withdrawal unit price, and assumes distributions are reinvested. Growth Return equals the percentage change in unit price.
