

Bentham Syndicated Loan Fund

Annual fund profile – 30 June 2023

Investment style

The Bentham Syndicated Loan Fund (the Fund) is actively managed and focused on generating stable investment income.

The Fund provides investors diversified exposure to the global syndicated loan market, with an active allocation to investments in different industries, issuers and geographies.

Investment objective

The Fund aims to achieve investment returns above the Credit Suisse Leveraged Loan Index (hedged to AUD) over the suggested investment time frame. The Fund's investment performance is also compared with the Bloomberg AusBond Bank Bill Index.

Primarily investing in the US syndicated loan market, the Fund seeks to add value through loan and security selection and industry rotation, while maintaining a highly diversified portfolio.

The Fund will be as close to fully currency hedged into AUD as is practicable. A NZD hedged version of the Fund is also available.

Management team

Bentham is a specialist fixed interest and credit investment manager. Bentham actively manages a number of high yielding funds with varying risk profiles. The portfolios are designed to generate income while diversifying risk in global credit markets. Bentham's goal is to deliver higher income to investors than can generally be achieved in traditional fixed interest and equity markets.

Prior to the establishment of Bentham, the founders worked together as part of the Credit Investments Group of Credit Suisse Alternative Capital Inc, which continues to provide exclusive sub-advisory investment management services for the Fund.

Bentham has 17 staff located in Australia and the Credit Investments Group has over 50 investment staff based in New York and London. The US team have a strong track record of managing global syndicated loan portfolios and are well resourced with market leading risk portfolio systems.

Syndicated loans – overview

A syndicated loan is a senior loan that is made to a company, whose credit rating is generally below investment grade. Loans generally pay a floating rate of interest, have a maturity date and can be redeemed early.

Senior loans have priority in repayment and are protected from the borrower's failure to repay the interest or principal by taking security over assets. This security is generally in the form of a fixed and floating charge over the company's assets. Security enhances recovery levels in the event of default (i.e. the secured debt holders get paid before all other debt and equity). In addition, loans generally have covenants which allow the lender to take action to protect their investment.

Senior loans within a company's capital structure

Portfolio construction

The Fund uses bottom-up analysis to select individual investments and employs a conservative approach to credit selection, emphasising preservation of principal. Active allocations are made to senior secured loans with additional investments in high yield bonds and collateralised loan obligations.

Using a credit-intensive relative value approach, loans are managed on the belief that returns above benchmark are driven by a strong credit culture and a systematic investment process. Security selection is based on relative value within the capital structure of comparable companies and industries. The preservation of principal and protection against downside risk plays an important

role in the investment process. The Fund has a high level of industry and issuer diversification.

Fund risk profile

Suggested investment time frame	Medium term – three years minimum investment
Volatility/risk level	Medium
Income distribution frequency	Monthly
Target distribution rate*	Target distribution rates for FY2024 set at one month Australian Bank Bill Swap Rate (BBSW) plus a 4.25% to 4.75% of the monthly unit price*
Fund benchmark	Credit Suisse Leveraged Loan Index (hedged into Australian dollars) [^]
Currency exposure	Hedged into Australian dollars
Issuer exposure limits	Maximum of 2% per issuer
Industry exposure limits	*Maximum portfolio exposure to any single industry sector will generally be up to 10% of the Fund's investment but will also allow two industries to be up to 15% and one industry to be up to 13.5%.
Diversity	Minimum of 60 issuers
Sector exposure limits	Minimum 60% syndicated loans Maximum 15% high yield bonds, Maximum 10% CDOs, Maximum 10% non-rated debt securities.

* Bentham intends to achieve the distribution rate for FY2022 with taxable income. If there is a shortfall of taxable income, the distribution may possibly include a capital return. The current distribution rate setting was based on the running yield of the Fund as at 30 June 2021 and assumes the Fund continues to achieve an equivalent yield for FY2022. Actual distributions, however, can differ from this setting because of future matters which are not known or able to be presently identified.

Distribution as a % of Net Asset Value (NAV), which is calculated as the cents per unit (CPU) distribution at month end divided by the ex-distribution unit price at the start of the month.

* Annual Distribution Return (Year-to-Date) is calculated as the Total Return (after fees) minus Growth Return. Total Returns (after fees) are calculated using pre-distribution month end withdrawal unit price and assumes all distributions are reinvested. Growth Returns equal the percentage change in the unit price.

Long-term correlation of asset class returns# ^

Loans as an asset class have historically had a low correlation to equities and a negative correlation to government bonds as shown in the table below. An allocation to loans may improve the diversity of a balanced portfolio and has historically improved the risk and return outcome.
